target length for the jumble/conglomerate opener.

2. Copyright & license block

Two versions below – pick one before this leaves
draft.

Option A – Hold in David's name, assign to the stichting later (recommended)

© 2026 [David – legal name], Amsterdam.
Rights to be assigned to the Provo 42 Foundation
upon its formal incorporation.

- Code: **MIT License** © 2026 [David – legal
name]

- Creative artifacts: **CC BY 4.0** © 2026 [David – legal name]
- House layer: **Provo 42 Artifact License** © 2026 [David – legal name]

Rationale: the stichting does not legally exist until the notarial deed passes, so it cannot yet be the rights holder. A natural person holds the rights now and assigns them on incorporation.

Option B – Keep the i.o. notice as written

© 2026 "The Provo 42 Foundation" (in formation)
 "Stichting in oprichting" → "i.o." → "**Provo 42 Foundation i.o.**"

- Code: **MIT License** © 2026 Provo 42 Foundation i.o.
- Creative artifacts: **CC BY 4.0** © 2026 Provo 42 Foundation i.o.
- House layer: **Provo 42 Artifact License** © 2026 Provo 42 Foundation i.o.

Caveat: attributing copyright to an "i.o." entity is legally shaky since the entity isn't yet established. Use only if you accept that risk for provenance/branding reasons.

3. Terminology reference

- **Stichting in oprichting** = foundation in formation (Dutch)
 - Abbreviation: **i.o.**
 - English gloss: **in formation** (i.e. being formed)
 - Working name in this state: "**Provo 42 Foundation i.o.**"
-

Changelog

- **v0.1** — Structured the persona sequence into a table; dropped placeholder slot #8; split the copyright block into Option A / Option B pending decision; added terminology reference.
- **v0.0** — Handwritten scratchpad (2026-09-09).
