INT. AGENT 327 WORKSHOP - DAY

Sunlight streams into a cozy garden room. A 3-axis CNC router hums in the corner, surrounded by freshly carved WOODEN TULIPS.

AGENT 327 (70s, sharp trenchcoat, glasses) sits in a velvet wingback chair, calmly carving timber.

The door BURSTS open. THE KLINGON WARRIOR MENTOR stands in the doorway, glares at the sawdust.

KLINGON MENTOR

You sit here carving flora while the operator rides an orange bicycle through a gale-force storm?! He dropped peanuts, 327! PEANUTS!

AGENT 327

(doesn't look up, blows away wood shavings)

He established Node F-03, bypassed an air-gapped security perimeter, and placed our manifesto directly in the Blender mailbox. That is open-source mastery, my friend.
